Daily Feed Ration — SNR Farm · Batch_02 (CCB-2026-519)

How to read this screen, field by field — using this batch's own live figures, not sample data.

CATTLE IN FATTENING	TOTAL HERD BIOMASS	AVG WEIGHT / HEAD	EXPECTED SELLING PRICE	SELLING TARGET DATE	DAILY FEED COST (TOTAL)
29 Head	6,831.00 kg	236.00 kg	৳ 13,200.00 / kg	Not Set	৳ 237,858.00 / day

Daily Feeding Ration Config

1 ingredient on file — portion size & unit cost per cow, per day

Ingredient: DSR-16 Cow Feed (Concentrate)

Pulled from the Admin Catalog — fixed name & pricing, not free text.

Portion: 6 kg / head / day

How much of this feed one cow eats per day.

Unit Cost: ৳ 1,367.00 / kg

Locked to the catalog price (see "ADMIN CATALOG" badge on-screen).

Daily Cost / Head: ৳ 8,202.00

Portion × Unit Cost — 6 kg × ৳ 1,367 = ৳ 8,202. Calculated, not typed.

Feeding Frequency: Once Daily

How often this portion is delivered.

Ration Start Date: 06/17/2026

The date the system begins auto-deducting this ration from stock, every day.

Feed Cost Analysis

Rolls the ration up to the whole herd — cost, stock, and coverage

Per-Ingredient / Total · Head · Day: ৳ 8,202.00

With only 1 ingredient, these two figures match. Add a 2nd ingredient and Total/Head/Day becomes their sum.

Herd Daily Cost (29 head): ৳ 237,858.00

Total/Head/Day × 29 head = ৳ 237,858 — exactly the "Daily Feed Cost (Total)" KPI tile above.

Live DSR-16 Feed Stock: 151.04 bags (4,531.20 kg)

What's currently recorded in Feed Stock for this product.

Daily Herd Ration Rate: 174.00 kg/day (5.80 bags/d)

Portion (6 kg) × 29 head = 174 kg — what the whole batch eats in a day.

Feed Stock Coverage: –26 Days Remaining

Live Stock ÷ Ration Rate, projected forward. See the note below — this has gone negative.

Two things on this screen need attention. Feed Stock Coverage is negative because the system auto-deducts this ration from feed stock every day from the Ration Start Date onward, whether or not new stock has since been logged — recorded stock-ins haven't kept pace, so log a Feed Stock-In for DSR-16 Cow Feed now. Separately, Selling Target Date shows "Not Set", even though it is normally auto-calculated as Start Date + 90 days — worth checking that Batch_02's Start Date was saved.
